

CSC 202 (D01A)
Computer Science II
Course Syllabus

Instructor	Jeffrey Elkner
Session	Spring 2021
Meeting Days	A Day (Tuesday and Thursday) [and for a few of you B Day]
Time	11:50 am - 1:10 pm
Location	Arlington Career Center Room 508 https://communitybridge.com/bbb-room/jelkners-classroom/
Contact	jde232@email.vccs.edu

Course Description:

Examines fundamental data structures and analyzes algorithms. Covers abstract data types and essential data structures such as arrays, stacks, queues, linked lists, and trees; introduces searching and sorting algorithms and algorithm analysis. 4 Credits.

General Course Purpose:

Examines data structures and analyzes algorithms. Covers data structures (including sets, strings, stacks, queues, arrays, records, files, linked lists, and trees), abstract data types, algorithm analysis (including searching and sorting methods), and objects.

Course Prerequisites/Co-Requisites:

Prerequisite: CSC 201 and MTH 263
Corequisite: MTH 264 or division approval

Course Objectives:

Upon completion of this course, the student will be able to:

- A. Analyze Problems
- B. Develop Algorithms in an Object Oriented Environment

Major Topics to be Included

- I. Data abstraction and object-oriented programming (review)
 - A. dynamic allocation
 - B. overloading functions and operators
 - C. constructors and destructors
- II. Recursion
 - A. analysis
 - B. applications
- III. ADT implementations (static and dynamic) and applications

CSC 202 (D01A)
Computer Science II
Course Syllabus

- A. linked lists (singly, doubly, circular)
- B. stacks
- C. queues
- D. trees and tree traversal
- IV. Searching
 - A. analyzing and comparing searching methods
 - B. relationships between methods and data structures
- V. Sorting
 - A. examples of order n^2 and order $n \log n$ sorts
 - B. analyzing and comparing sorting methods
- VI. Optional other topics
 - A. hashing
 - B. tables
 - C. file structures
 - D. sets
 - E. Templates

CSC 202 (D01A)
Computer Science II
Course Syllabus

Time Allocation per Topic

The following table has the breakdown of the time in this course that will be spent on each course topic:

Ref	Topic	Hours	Percentage
I	Data abstraction and object-oriented programming	10	16%
II	Concept of Recursion	2	3%
III A	Linked lists / pointers	10	16%
III B	Stacks	8	13%
III C	Queues	8	13%
III D	Trees	2	3%
IV	Searching	4	7%
V	Sorting	6	9%
VI	Other optional content or Enhance the above	8	13%
	Exams and Quizzes (NOT including final exam)	6	9%
	Total:	64	100%

Required Instructional Materials:

- The C Programming Language, 2nd Edition
- [Problem Solving with Algorithms and Data Structures using Python](#)

Course Credit: 4 Credits

CSC 202 (D01A)
Computer Science II
Course Syllabus

Policies:

I. Expectations

- a. Software Design is a rigorous, college level course that will require sustained and consistent engagement from students.
- b. An average of 90 minutes of homework will be assigned for each 90 minutes in class. We will be utilizing a flipped classroom learning environment, where the lecture portion of the course material will be viewed individually at home *before* class meets, and class time will be used for collaborative engagement and discussion.
- c. Daily "mini quizzes" at the beginning of class will be used to be sure homework readings and practice have been completed. To be successful in this class, students will be expected to be prepared for these quizzes when they arrive in class.

II. Grading Policies

- a. Grading Scale
A= 100 - 90 B= 89 - 80 C= 79 - 70 D=69 - 60 F= 59 and below
- b. Students will receive a weekly cumulative letter grade that will incorporate daily quizzes, tests, projects, and presentations. These weekly evaluations can be challenged by the student, *but only during the week immediately following when the evaluation is given.*
- c. The average of the weekly evaluations will make up 70% of the final grade, with the course final exam making up 30%.
- d. In cases where district grading policies conflict with college grading policies, the high school and college grades may differ; this may include assignment/test retakes, extended assignment due dates, capped minimum grade allowed, among other such district policies.
- e. It is important that students check their final NOVA grades in Blackboard as soon as the course(s) completed.

III. Course Policies

a. Academic Integrity

- i. The College does not tolerate academic dishonesty. Students who are not honest in their academic work will face disciplinary action along with any grade penalty the instructor imposes. Procedures for disciplinary measures and appeals are outlined in the Student Handbook (<http://www.nvcc.edu/students/handbook/>). In extreme cases, academic dishonesty may result in dismissal from the College.
- ii. **Plagiarism:** is the act of appropriating passages from the work of another individual, either word for word or in substance, and representing them as one's own work. This includes any submission of written work other than one's own. In short, plagiarism means using the exact words, opinions, or factual information from another person without giving that person credit. Students who are not honest in their academic work will face disciplinary action along with any grade penalty the instructor imposes. For more information about student academic integrity: <https://www.nvcc.edu/curcatalog/policies/integrity.html>

b. Disabilities

- i. Students with disabilities are required to contact NOVA's Office of Disability Support Services (DSS) to discuss possible accommodations. All information is kept confidential and may increase your chances of success in the academic setting. If accommodations are agreed upon, student will receive a Memorandum of Accommodation (MOA) by DSS. For more information about NOVA's DSS office: <https://www.nvcc.edu/disability-services>.

CSC 202 (D01A)
Computer Science II
Course Syllabus

c. Self-Advocacy

- i. Students are expected to reach out to their instructor if they do not understand content or expectations.
- ii. College instructors and other college personnel will not talk with a parent without the permission of and presence of the student. The conversation is between the administrator / faculty member and the student. The parent’s role is to listen, give moral support, and summarize information and agreements if needed.
- iii. Dual enrolled students have access to full NOVA campus services to include tutoring, library, and counseling services; student resources are found here:
<http://www.nvcc.edu/students/index.html>

IV. Course Schedule

a. Critical Course Dates

Course Start Date	Tuesday, February 2, 2021
Course Drop Date	Friday, February 19, 2021
Course Withdrawal Date	Friday, April 23, 2021
Final Exam Date	Week of June 14 to 16, 2021
Course End Date	Wednesday, June 16, 2021

- b. Final Exam Date:** *The final exam will be given during the last week of class, between Monday, June 14 and Wednesday, June 16.*
